PROFILE

Software engineer focused on backend development interested on building clean, maintainable, scalable, and extensible software.

Currently, my greatest interest lies in distributed systems development, although I am interested in all areas of development. I particularly value a good CI/CD infrastructure

RELEVANT EXPERIENCE

- **NOV 2021 – SEP 2022**   **BACKEND JAVA DEVELOPER**

Vexcel Imagin

- Develop and maintainance of **API Rest** endpoints using **Java**.
- Use of **Postman** for doing requests.
- Testing services using **JUnit** and **Cucumber**.
- Document API endpoints using **OpenAPI**
- Monitoring services with **Datadog**.
- Handle customer tickets through **Jira**.

PROJECTS

- **ON DEVELOPMENT**   **SPRING BOOT/ANGULAR SAAS PROJECT**

https://albgott.com/auth/signup

- **SaaS microservices** project build from frontend to hosting.
- Backend: **Spring boot** stack, postgreSQL, RabbitMq, AWS.
- Frontend: **angular**, astro.
- Infrastructure: Jenkins, **docker**, Nginx.
- Project goal focuses on research and personal development.

EDUCATION

- **2018 – PRESENT**   **SOFTWARE ENGINEERING - URJC UNIVERSITY**

TECH SKILLS

- **Java, Java Spring Boot...**
- MySQL/ Postgresql
- Git
- AWS

- HTML/ CSS/ JavaScript
- **Angular**

- **Microservices**
- Jenkins
- **Docker**
- Nginx
- **RabbitMq**

LANGUAJES

- Spanish (native)
- English (intermediate -B2)
